

The Great Water Mystery

FREE Science Presentation for K – 6th grades

www.yubariver.org

The Great Water Mystery is a *free* interactive presentation that uses an engaging mystery story to teach students about the California Content Standards of the water cycle, watersheds, and resources while also delivering a powerful message about the importance of water conservation.

By using dramatic slides, hilarious audience participation, storytelling, and exciting demonstrations, this program has informed, inspired and captivated **183,477** students throughout California since 2002. The presentation comes with activity packets for each grade level, giving teachers a fun and easy way to expand on the presentation.

“The Great Water Mystery” is adaptable for students from K through 6th grade, and works extremely well as a full school assembly or in individual classrooms.

What people are saying about “The Great Water Mystery”

“I have rarely seen a guest presentation so on target for my students ~ so informative, energetic, creative and influential.” Merry Byles-Daly, 4th grade teacher, Grass Valley Charter School

“This assembly was a perfect companion to the work we’d done in our Science text.” Rich Howell, 5th grade teacher, Pleasant Valley Elementary

“We loved your presentation – so fun and so convincing!” Marie Hoffman, 3rd grade teacher, Williams Ranch Elementary School.

“Your presentation was terrific. It was entertaining, funny, and we all learned a whole lot about water.” Brigitte Creencia, 5th grade student, Bowman Elementary.
